1. INTRODUCTION

1.1. Project Overview

MeshChain is a supply chain and manufacturing platform based on NFTs and the MES Token that integrates the cryptocurrency sector with the traditional economy by leveraging the innovative potential of blockchain technology. The project enhances production, supply, marketing, and sales processes through tokenization and smart contracts, while establishing a transparent, reliable, and sustainable ecosystem for investors and businesses. By merging the liquidity and scalability benefits of the cryptocurrency realm with conventional commerce, MeshChain generates new financial opportunities for both individual investors and manufacturers.

1.2. Overall Objective and Vision

The primary objective of MeshChain is to instigate a transformative revolution within the supply chain and manufacturing industries through the utilization of the decentralized and transparent framework of blockchain technology. In this pursuit, we seek to expedite the funding processes for businesses and enhance their access to global markets by offering asset tokenization via NFTs and the MES Token. Our initiative aspires to redefine the future of commerce by bolstering the digital marketing strategies of brands while delivering a robust financial infrastructure through smart contracts and staking mechanisms.

Our vision is to establish a sustainable growth model that benefits both investors and producers by integrating the innovative tools provided by the cryptocurrency sector with the real economy. MeshChain seeks to develop a fair and transparent trading ecosystem on a global scale by addressing inefficiencies within the supply chain. In this manner, we aspire to facilitate the digital transformation of traditional trade participants and present new investment opportunities for cryptocurrency investors in the real sector.

1.3. Purpose and Primary Objectives of the Project

01

The objective of the MesChain project is to integrate the capabilities of blockchain technology and cryptocurrency assets with the real sector, enhancing the efficiency, transparency, and profitability of production, investment, marketing, and sales processes within the supply chain. This distinctive model seeks to establish a sustainable ecosystem for both investors and manufacturers, providing equitable opportunities and a dependable business framework in the global marketplace.

02

The swift expansion of e-commerce within the global market, coupled with the rising adoption of blockchain technology, indicates that the model presented by MeshChain possesses significant potential in both commercial and investment contexts.

Customers who purchase products receive MES token rewards in return for their marketing support through participation in social media activities.

MeshChain: An innovative NFT-driven supply chain model that spans from manufacturing to the consumer!

2.2. Key Advantages of MeshChain

Tokenization through NFTs:

Facilitating the commercial utilization of physical and digital assets through their conversion into NFT format, thereby allowing investors to engage in substantial projects with minimal investments.

Stake Models:

Empowering users to generate passive income over specified durations by investing in the platform, thereby fostering the sustainable development of the ecosystem.

E-Commerce

Enhancing sales volume and market access through integration with major marketplaces such as Amazon, eBay, Etsy, and Trendyol. They can make purchases with confidence.

Freelance Marketplace:

The freelancer platform integrated within the MeshChain ecosystem enables users to generate income through remote work, while companies can acquire the necessary services with the assurance of blockchain security.

Dropshipping Business Model:

Establishing a competitive e-commerce network in the global market by offering both our proprietary products and those of various brands through MeshChain.

Participate in the Event

By fostering a robust community, brands can directly connect with their target audiences and enhance their marketing strategies through blockchain technology.

3. FINANCING OUR CONTRIBUTIONS

Sustainability and Value Addition

MesChain seeks to deliver advantages to its investors and ecosystem participants by establishing a robust and sustainable financial framework through its services and initiatives.

Generating Value through Digital Transformation

These services seek to generate distinctive value by fostering sustainable growth within our ecosystem, creating opportunities for investors, and facilitating global access to brands via digital assets and innovative financial solutions.

Investment

By allocating a segment of its financial resources to cryptocurrency and commodity investments, Meschain fortifies its ecosystem and provides passive income opportunities for MES token and NFT investors.

E-commerce

Leveraging our production and supply capabilities, we aim to develop a comprehensive e-commerce strategy that encompasses the establishment of our own stores and the provision of dropshipping services in both local and international markets.

Marketing

By leveraging the strengths of our robust community framework, sophisticated marketing software, and extensive global supply chain network, we aspire to deliver impactful marketing services to brands while generating profit for the ecosystem.

NFT Frameworks

We strive to transform the NFT collections that we create or acquire into digital assets for sale, thereby generating financial returns.

MES Token

Through the sale of the MES token, the digital asset within our ecosystem, we seek to establish a robust financial foundation for our project.

3.1 The Functionality of Financial Inputs

MeshChain's revenue model comprises several key components designed to ensure the ecosystem's sustainability:

NFT Transactions

The sale of tokenized assets as NFTs offers investors direct income opportunities.

MES Token Offering

Income derived from MES Token staking and transaction fees ensures financial stability within the ecosystem.

E-Commerce Revenues

Revenue generated from sales on international marketplaces, including Amazon, eBay, Etsy, and Trendyol.

Dropshipping

Dropshipping membership income and sales revenues offer financial support to Meschain.

Investment Revenue

MesChain Capital generates financial returns by investing in high-quality projects within the cryptocurrency sector through strategic structuring.

Marketing Revenues

Leveraging our robust community and sales potential, we strive to generate revenue for the ecosystem by offering marketing support to brands and exchanges.

4. ROADMAP

4.1. Short Term Studies

Stage	Goals	Explanation
Short-Term (0-6 Months)	MVP Creation	<ul style="list-style-type: none">- Developing and evaluating the Blockchain infrastructure.- Creation of an NFT tokenization module. Establishment of the staking platform. <ul style="list-style-type: none">- Initiating fundamental integrations with e-commerce platforms.
Short-Term (0-6 Months)	Tokenomics and Token Allocation	<ul style="list-style-type: none">- Conclusion of the pre-sale and public sale phases of MES Token.- Execution of the token distribution strategy.
Short-Term (0-6 Months)	Community Development and Promotion	<ul style="list-style-type: none">- Initial user acquisition through airdrop campaigns.- Collaborations with social media and influencers.- Execution of the Join Event program.
Short-Term (0-6 Months)	Attracting Preliminary Investors	Completion of seed investment and allocation of funds for project infrastructure, marketing, and liquidity pool.

4.2. Intermediate Term Studies

Stage	Goals	Explanation
Medium Term (6-12 Months)	Completion of the NFT and Tokenization Platform	<ul style="list-style-type: none">- Creation of an NFT marketplace. The initial NFT collections are now available for purchase.
Medium Term (6-12 Months)	Expansion of the Staking Platform	<ul style="list-style-type: none">- Enhancement of the staking reward mechanism.- Establishment of various stake pools.
Medium Term (6-12 Months)	E-Commerce and Logistics Integration	<ul style="list-style-type: none">- Comprehensive integration with platforms including Amazon, eBay, and Trendyol. Implementation of a blockchain-based logistics tracking system.
Medium Term (6-12 Months)	Global Market Expansion	<ul style="list-style-type: none">- Expansion into the Middle Eastern and Chinese markets. Initiating worldwide digital marketing campaigns.
Medium Term (6-12 Months)	Second Phase Investment	Attracting investment for product integration, expanding liquidity pools, and fostering technological innovations.

4.3. Long-Term Studies

Stage	Goals	Explanation
Long-Term (12+ Months)	Global Supply Chain and Logistics Framework	Comprehensive integration of supply chain networks across China, the United States, the Middle East, and Europe. - Logistics optimization supported by artificial intelligence.
Long-Term (12+ Months)	Expanding Non-Fungible Tokens and Tokenization	- Development of new NFT collections. - Creating sustainable revenue models through NFTs.
Long-Term (12+ Months)	Development of a Staking and Investment Platform	- Introducing innovative investment vehicles. - Enhancing staking reward rates.
Long-Term (12+ Months)	Global Marketing and Community Engagement	- Coordinating international events and webinars. - Initiatives for community expansion.
Long-Term (12+ Months)	Third Phase Investment	Attracting investment for the integration of global supply chains, technological innovations, and marketing initiatives.

EXPLANATIONS

Short Term (0-6 Months): This phase involves the establishment of the project's foundational infrastructure and the acquisition of initial users.

Medium Term (6-12 Months): This phase involves scaling the project, enhancing NFT and staking platforms, and initiating expansion into the global market.

Long Term (12+ Months): The stage in which MeshChain emerges as a global leader, with the supply chain and logistics network fully integrated.

5. NFT AND TOKENIZATION

Investor Potential in the Crypto Sector

The cryptocurrency sector is a financial market that is rapidly growing worldwide and is at the center of digital transformation. As of 2024, the number of global cryptocurrency investors has exceeded 562 million, indicating a major shift from traditional investment models to digital assets. The NFT (Non-Fungible Token) market has reached a sales volume of \$8.83 billion in 2024, making it an important place in the tokenization of digital assets.

This growth shows that investors are focusing on the potential to generate income not only in cryptocurrencies but also in real sectors through NFT and tokenized assets.

Tokenization of Production and Supply Chain with Meschain Meschain combines traditional trade with digitalization by offering innovative solutions in production and supply chain. The Meschain ecosystem ensures that every product produced is recorded with blockchain technology, tracked with transparency, and tokenized and divided into shares. In this way, investors can participate in profit sharing by turning products in production processes into digital assets through NFTs.

5.1. Potential and Advantages of the NFT Market

Transparency: With every stage of the production process documented on the blockchain, investors can seamlessly track the production, supply, and sales processes of the products.

Divided Ownership: The tokenization of products via NFTs enables individuals to acquire shares in projects that necessitate substantial investment budgets at a minimal cost.

Passive Income: Investors can generate consistent income by allocating profits to shareholders as the tokenized products are sold.

MES Token Integration: Investors can execute transactions within the Meschain ecosystem using MES tokens, which grant access to enhanced discounts, staking opportunities, and exclusive investment projects.

Meschain's tokenized production model allows investors to generate returns through the following methods:

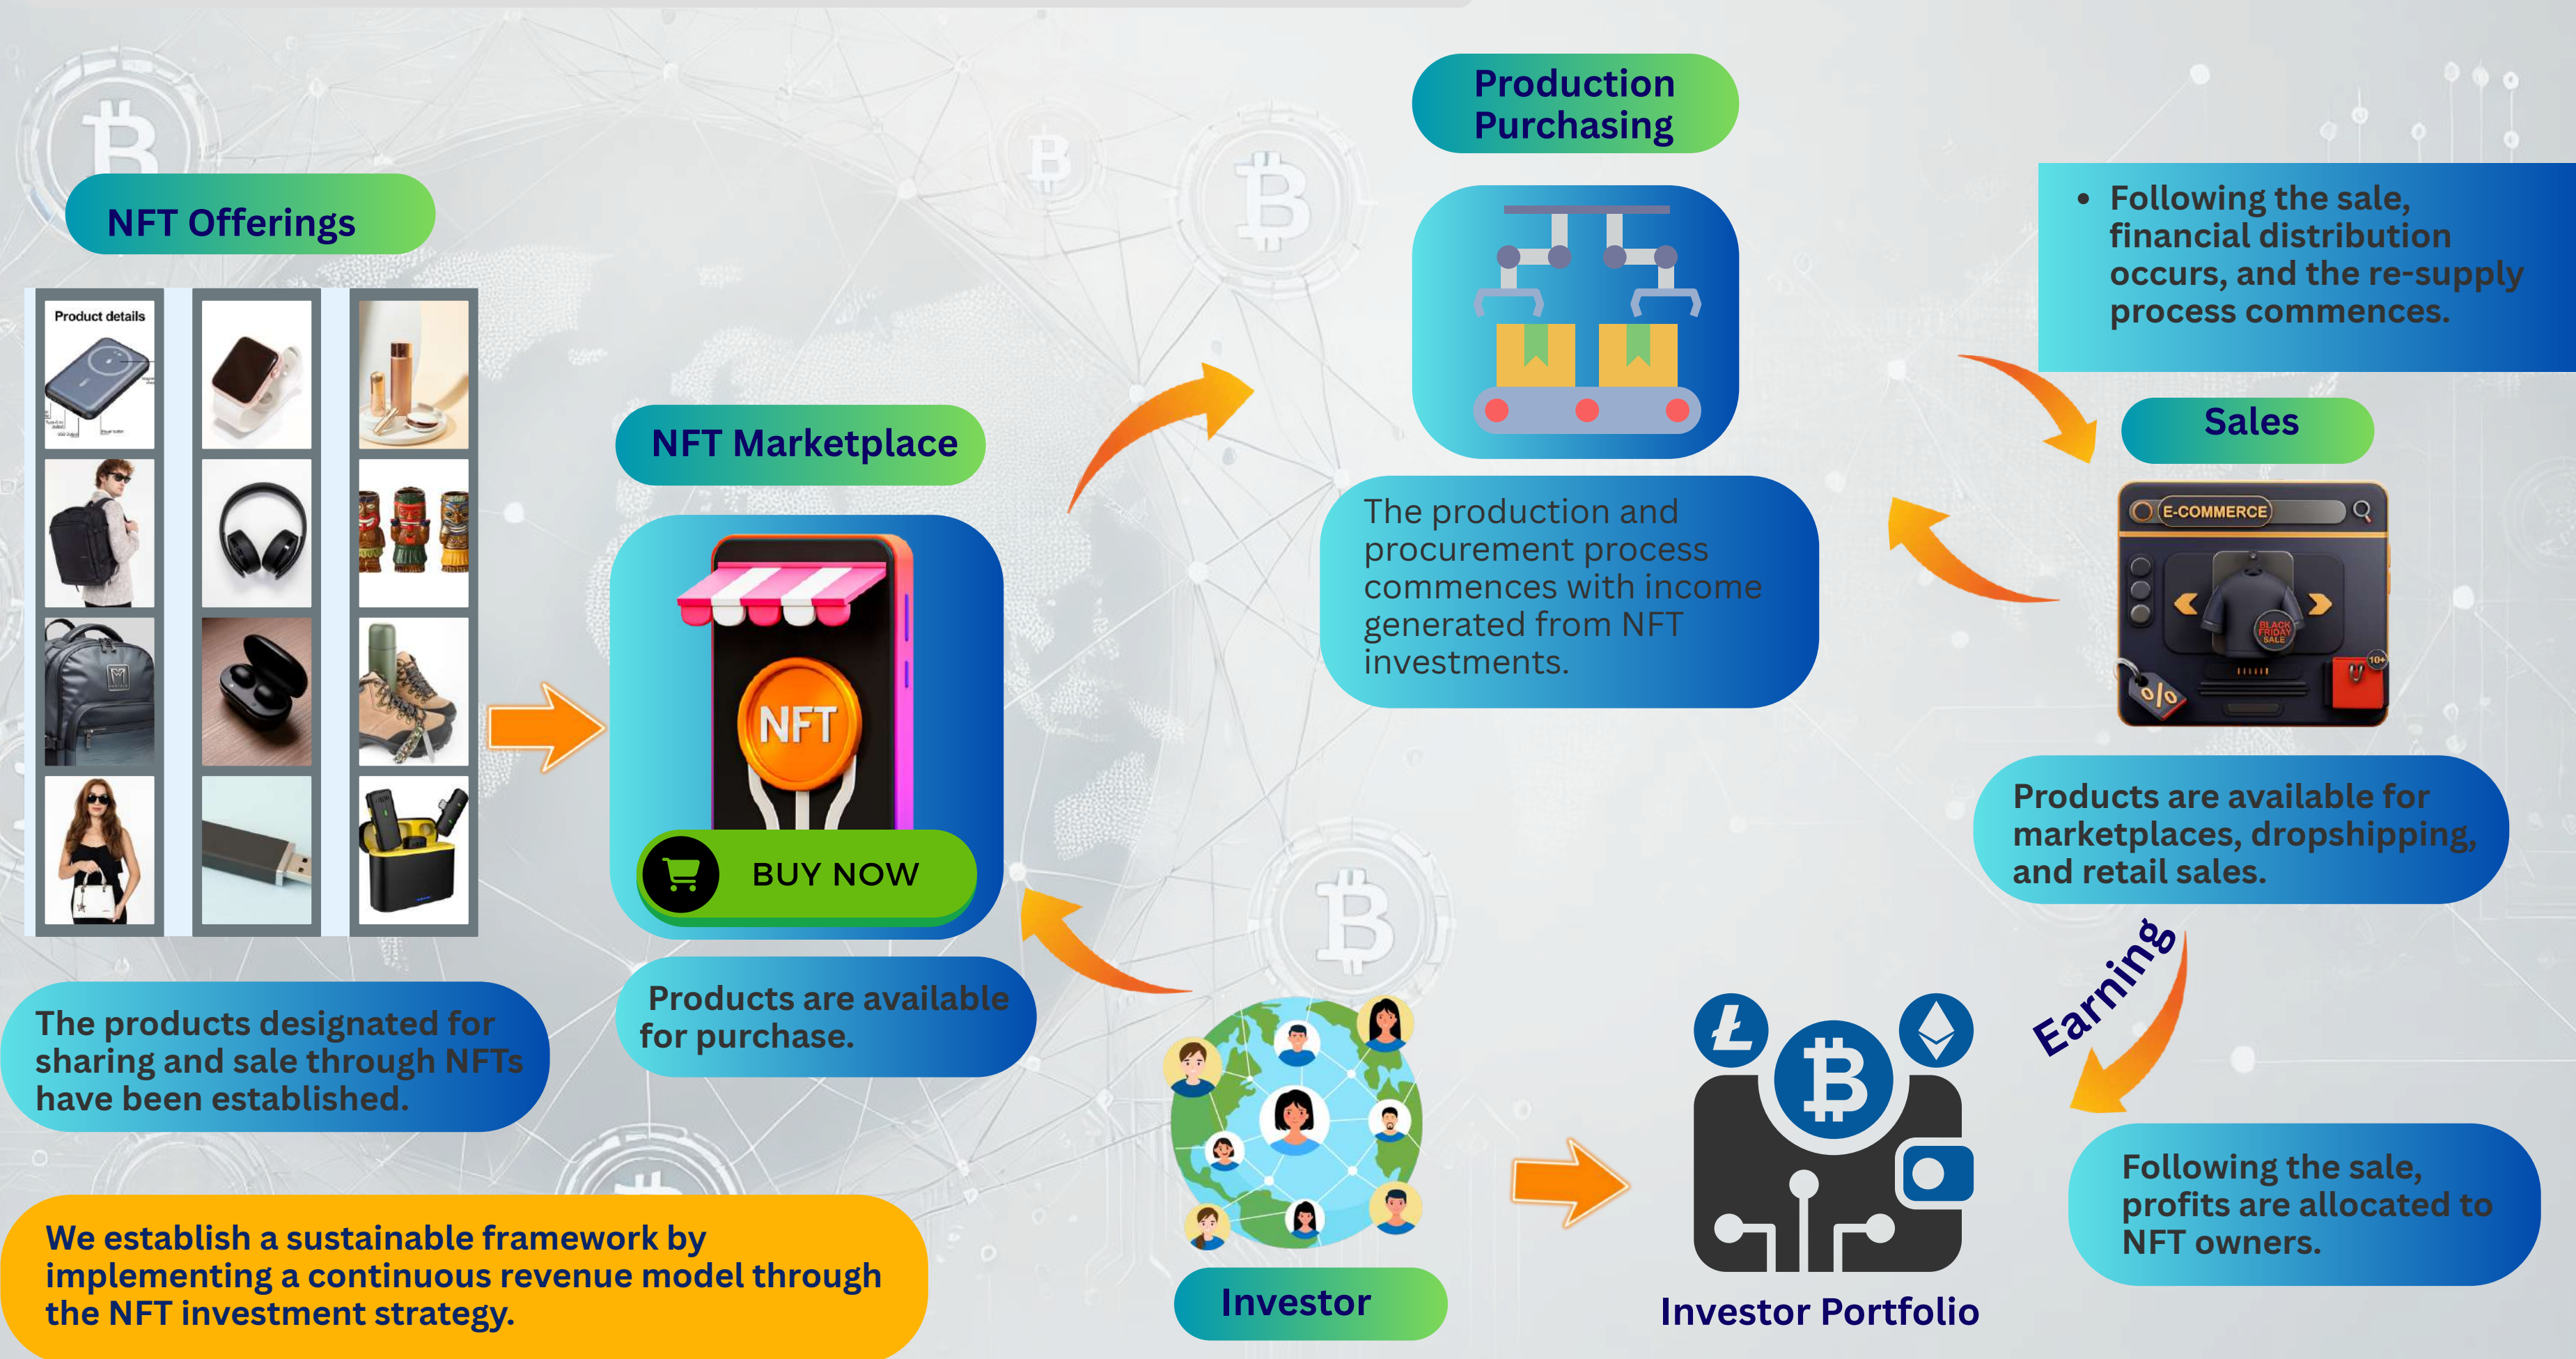

- Dividend distributions in the processes from production to sales.
- NFTs appreciating in value on the secondary market
- Generating supplementary income through MES token staking initiatives.
- Generating revenue from high-potential cryptocurrency initiatives via targeted project investments.

• NFT Market Share Data

In total sales, Ethereum remains at the forefront with a sales volume of **\$44.9 billion**. Solana secured the second position with a sales volume of **\$6.1 billion**, whereas Bitcoin-based NFTs achieved a total sales volume of **\$4.9 billion**.

As of 2024, the global population of cryptocurrency investors has risen by **33%**, totaling **562 million**. In Türkiye, **19.3%** of the population engages in cryptocurrency investments, amounting to approximately 16 million individuals.

5.2. MesChain's Distinctive NFT Investment Strategy

5.3. NFT Investor Dividend Distribution Table (Illustration)

Period	Drop Shipping Sales (Units)	Proprietary Store Sales (Units)	Total Sales (Units)	Net Profit (Decline) (\$)	Net Profit (Store) (\$)	Total Net Profit (USD)	Profit Allocated for Distribution to NFT Owners (30%) (\$)
Q2 2025	90,000	90,000	180,000	270,000	810,000	1,080,000	324,000
Q3 2025	90,000	90,000	180,000	270,000	810,000	1,080,000	324,000
Q4 2025	90,000	90,000	180,000	270,000	810,000	1,080,000	324,000
Q1 2026	90,000	90,000	180,000	270,000	810,000	1,080,000	324,000
Total (Annual)	360,000	360,000	720,000	1,080,000	3,240,000	4,320,000	1,296,000

- The sales target has been raised each quarter.
- The profit share pool was determined based on the actual sales figure (30%).
- The total profit to be distributed among investors is indicated.

5.4. Structure and Function of the MES Token

Given the comprehensive nature of the MesChain Ecosystem, which encompasses a variety of services, the MES token functions as a dynamic digital asset, providing opportunities for utilization across multiple domains.

Payment Method

It may serve as a method of payment for MesChain products and services.

Stake Platform

Owners who acquire MES tokens and secure them on the Stake platform will have the opportunity to passively earn 25% of the revenue generated from our cryptocurrency investments and commercial activities.

Awards and Initiatives

Customers who scan the QR code on the products and complete tasks while shopping will receive MES token rewards in exchange for their efforts.

Investment Instrument

Investment vehicle: Investors who acquire MES tokens can realize investment profits from the anticipated price appreciation driven by demand and the functional attributes within our ecosystem, thus categorizing it as an investment vehicle.

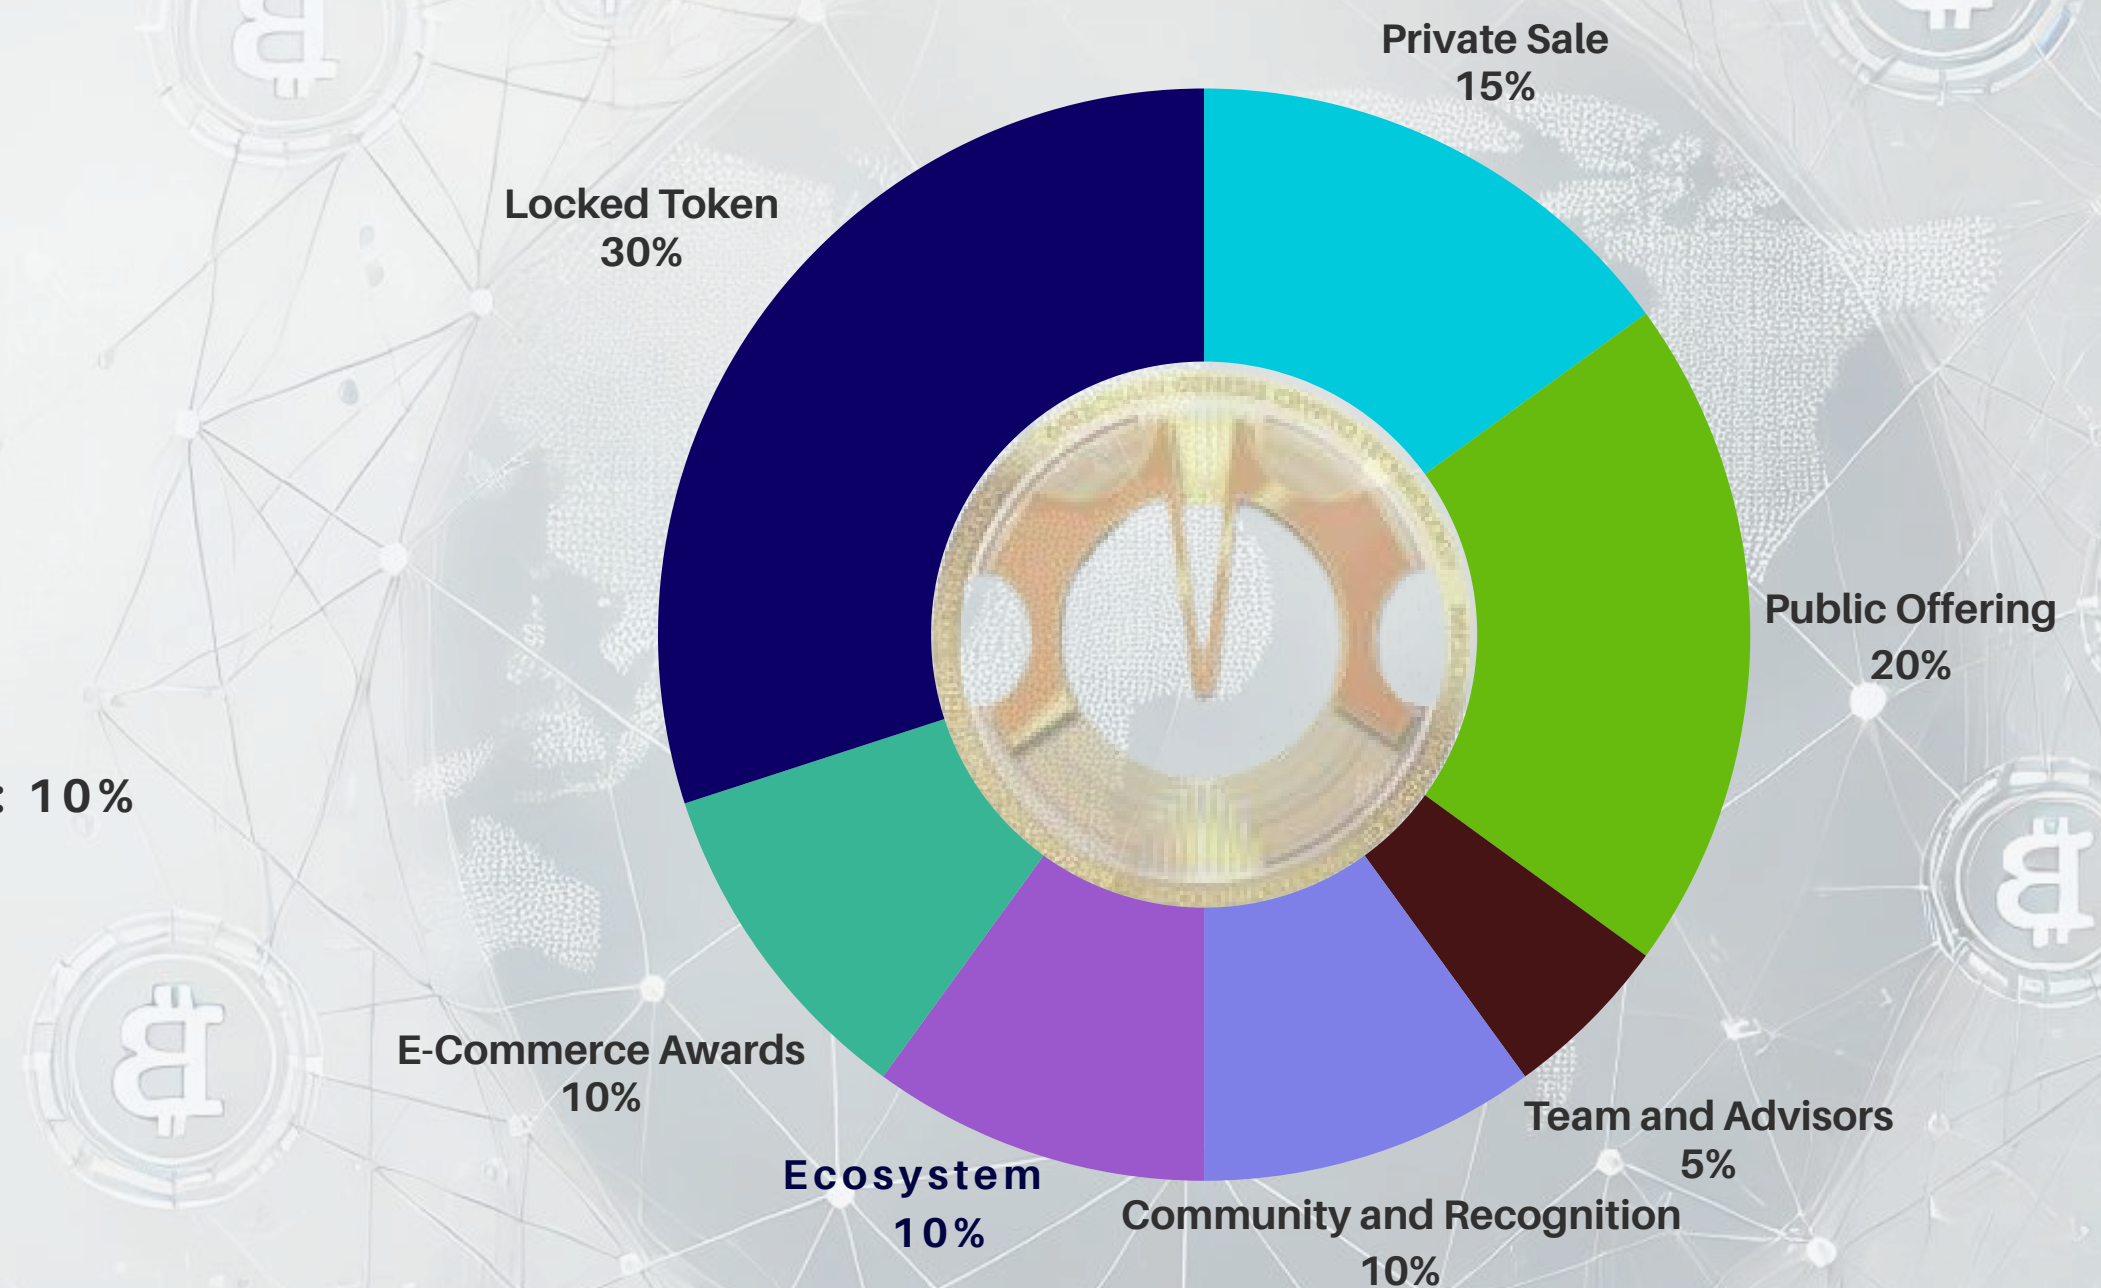

NFT Marketplace

The MES token will be utilized for services including the purchase and sale of NFTs on our NFT platform.

5.5. Tokenomics and Economic Framework

- Private Sale: 15%
- (Public Sale): 20%
- Team and Consultants: 5%
- Community and Rewards: 10%
- Ecosystem Development and Collaborations: 10%
- E-Commerce Incentives: 10%
- Locked Token: 30% (2027)

MeshChain enhances the financial dynamics of the ecosystem through the distribution and application of the MES Token.

5.6. MES Token and Staking Model

Distinct Staking Framework

One of the most significant services that enhances the sustainability and financial cycle of MesChain is our staking platform.

The potential for cryptocurrency investment is significant, yet it carries considerable risk. Meschain Capital invests in high-quality crypto projects by forming strategic partnerships with companies. We allocate 30% of investment income as dividends to investors who stake MES tokens.

By providing investment income rather than MES tokens as a staking reward, we establish a token balance that generates demand independent of an inflationary structure.

Stake Investment Benefits

- We provide MES owners the opportunity to invest in prospective projects that individual investors cannot engage in independently, facilitated by our corporate structure.
- We generate sustainable profits by mitigating risk through our diverse investment strategies in volatile market conditions.
- We strive for a consistent appreciation in the MES token price by transforming the MES token into a sustainable investment vehicle.

MES Stake: Fortify your investments, shape the future!

5.7. MES Token Stakeholder Compensation Plan

Period	Initial Staking Amount (\$)	Quarterly Profit Percentage (%)	Profit Amount (\$)	Total Value (USD)	Early Withdrawal Dividend	Early Withdrawal Penalty Rate (%)	Deduction Amount (\$)
Q2 2025	1,000,000	20%	200,000	1,200,000	Fifty percent of the profit may be withdrawn.	%10	100,000
Q3 2025	1,200,000	22%	264,000	1,464,000	Seventy-five percent of the profit may be withdrawn.	%5	73,200
Q4 2025	1,464,000	25%	366,000	1,830,000	Ninety percent of the profit may be withdrawn.	%2	36,600
Q1 2026	1,830,000	28%	512,400	2,342,400	All profits are eligible for a +5% bonus.	0%	0
1 Annual Bonus	-	+5%	117,120	2,459,520	Total profit plus bonus	0%	0

This framework:

- ✓ Commences with an investment of 1,000,000 USD.
- ✓ Delivers returns of 20% or greater each quarter.
- ✓ An additional 5% bonus will be granted at the conclusion of 12 months.

In the event of early withdrawal, the percentages for profit distribution and penalties are clearly defined.

5.8. Stock Exchange Listing and Market Dynamics

Year	Stock Exchange Listing	Market Influence
2025 Q3	First Central Exchange (CEX)	Volume expansion and price escalation
2026 Q2	Tier 2 Exchanges (MEXC, KuCoin, etc.)	Enhanced liquidity, substantial investor inflows
2027 Q1	Tier 1 Exchanges (such as Binance, Coinbase, etc.)	Widespread adoption, price surge
2028	Involvement of institutional investors	Exit to the 0.10 - 0.20 USD range.

Outcomes and Forecasts

- By 2028, all MES tokens in circulation will be fully utilized, leaving no available supply.
- Price growth accelerates alongside stock exchange listings.
- As individuals engage in the buying and selling of MES Tokens within the market, the circulating supply attains a specific equilibrium.
- Post-2028, institutional investors and major traders will enter the market, driving prices upward.

5.9. MES Token Supply-Demand Equilibrium & Projected Price Strategy

Year	Application Contexts	Required MES Quantity	Aggregate Demand	Circulating Supply	Remaining Complimentary MES	Estimated Cost (USD)
2025 (Start)	-	-	-	3,000,000,000	3,000,000,000	0.001

6. MARKETING STRATEGY

Presentations aMeshChain seeks to expand swiftly within the global market and establish a broad customer base through the implementation of an innovative and multifaceted marketing strategy. Tools that can be utilized for lectures, speeches, reports, and more.

6.1. Digital Marketing and Social Media Strategies

Multi-Channel Strategy

MeshChain's brand awareness will be enhanced through digital advertising, search engine optimization, search engine marketing, and social media campaigns.

Data-Driven Approaches

Campaign performance will be enhanced through a detailed analysis of user behavior, web traffic, and social media interactions.

Content Marketing

The advantages of the ecosystem and investment prospects will be elucidated through blog articles, video content, and interactive webinars.

6.2. Collaborations with Influencers

Global and Local Collaborations

Through partnerships with prominent influencers and bloggers within the industry, MeshChain will unveil its innovative financial models and e-commerce integrations to a broad audience.

Promotional Offers

Direct access to the desired customer base will be facilitated through specialized campaigns and launch events conducted via influencers.

6.3. Community Engagement and Events

Participate in the Event Program:

User engagement and interaction will be enhanced by distributing MES Token rewards to individuals who fulfill specified tasks through social media.

Social Media Networks

Users' dedication and communication regarding the project will be enhanced through proactive community management on Telegram, Discord, and other platforms.

Events and Webinars

Direct engagement between investors and users will be facilitated through regular online events, seminars, and Q&A sessions.

How the Join Event Program Functions

Customers who acquire our products enroll in the join event program.

Customers engage with our community by fulfilling tasks on social media.

Customers and our community members who complete tasks are rewarded with MES tokens.

7. INVESTMENT AND FINANCIAL STRATEGY

MeshChain is advancing with the objective of sustainable global growth by strategically utilizing the investments it has received. In the process of developing innovative applications in e-commerce and supply chain management, it enhances its marketing efforts and broadens its ecosystem by assessing investment opportunities.

Our financial planning is centered on four fundamental areas:

- ◆ **E-Commerce and Supply Chain Solutions:** Resources are dedicated to the production, integration, and optimization of global logistics processes for product categories.
- ◆ **Marketing and Growth Strategies:** Cutting-edge marketing models are employed to enhance brand visibility and facilitate expansion into international markets.
- ◆ **Liquidity Management and Stock Exchange Integration:** Strategic measures are being implemented to enhance market liquidity, thereby bolstering investor confidence and ensuring financial stability.
- ◆ **Investment and Expansion Opportunities:** Strategic allocation of resources is designated for new business partnerships, infrastructure development, and ecosystem enhancement.

In accordance with this plan, MeshChain seeks to establish a robust global trade and finance ecosystem by adhering to a roadmap centered on sustainable growth.

7.1. Initial Stage Investment Strategy

The MeshChain project will commence with an initial investment of \$500,000. This capital will be utilized strategically to establish the project's core infrastructure, cultivate the ecosystem, and support early-stage growth. Subsequently, a second phase of \$1 million is planned, followed by a comprehensive investment of \$5 million, contingent upon the project's initial successes.

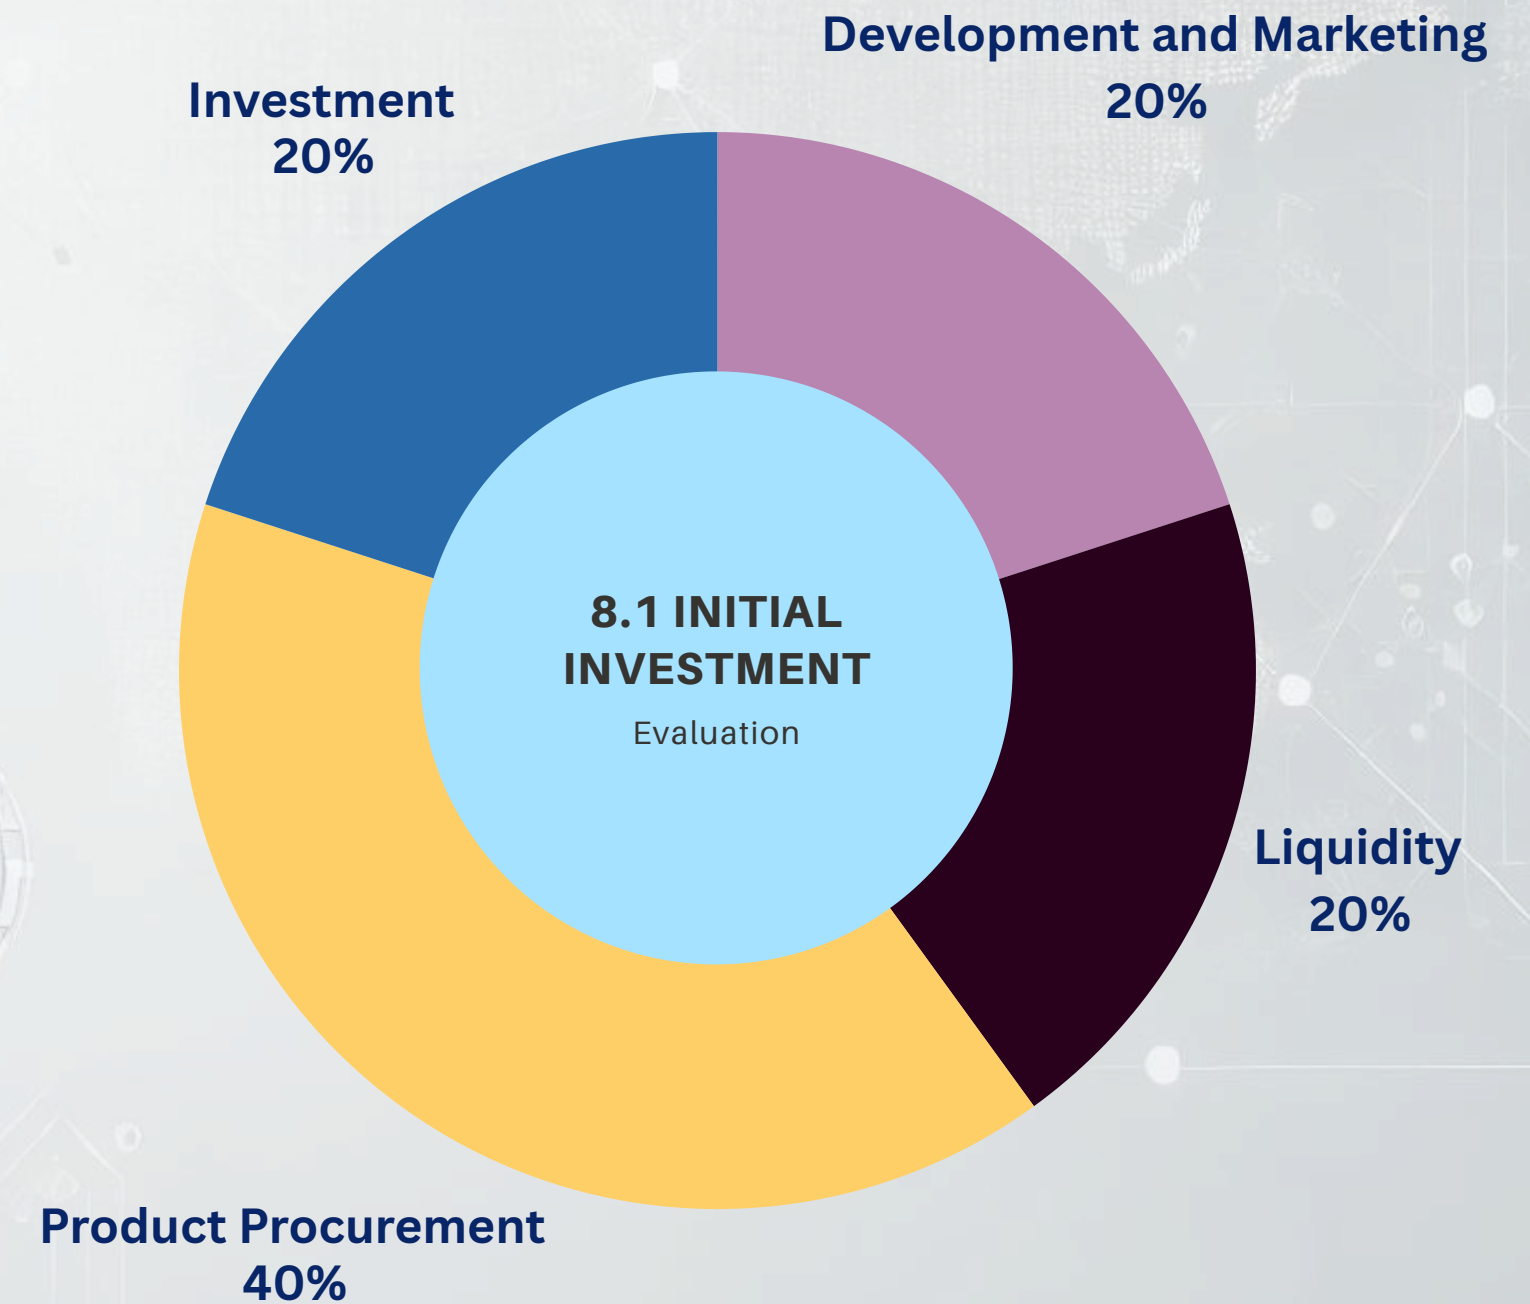

Investment Allocation		500,000 USD
Development and Marketing		100,000 USD
Facilitating Liquidity in Stock Exchanges		100,000 USD
Production and Integration for Product Categories in E-Commerce:		200,000 USD
Pre-Sale Investment		100,000 USD
Amount of MES Sold	666,666,666	PRICE: 0.00075

7.2. Second Stage Investment Strategy

The Meschain project seeks to utilize the \$1 million investment it has secured in a sustainable and efficient manner. In this regard, the funds are primarily intended for allocation to income-generating sectors.

Investment Allocation		1,00,000 USD
Development and Marketing		200,000 USD
Facilitating Liquidity in Stock Exchanges		200,000 USD
Production and Integration for Product Categories in E-Commerce:		400,000 USD
Pre-Sale Investment		200,000 USD
Amount of MES Sold	1,000,000,000	PRICE: 0.001 USD

7.3. Tertiary Stage Investment Strategy

MeshChain's third-phase investment strategy will be guided by global expansion, enhanced integrations, and sustainable growth objectives. At this juncture, we seek to establish long-term stability and value by fortifying our ecosystem.

Investment Allocation	5,000,000 USD
Development and Marketing	500,000 USD
Facilitating Liquidity in Stock Exchanges	500,000 USD
Production and Integration for Product Categories in E-Commerce:	2,500,000 USD
Pre-Sale Investment	1,500,000 USD
Amount of MES Sold	2,000,000,000
	PRICE: 0.0015(+)

8. MESCHAIN ECOMMERCE PLAN

We establish agreements with suppliers for the sales and marketing of products.

Products bearing the MESCHAIN brand are manufactured.

Our objective is to establish a swift and seamless supply network through our warehouse system.

On our e-commerce platform, transactions occur in both local and international marketplaces.

Allmes STORE

Product supply is delivered to stockless vendors.

By establishing a comprehensive sales network in both local and global markets with Meschain, we are enhancing brand value and creating a sustainable framework that will yield profits for our investors and foster the growth of our ecosystem.

8.1. Production and Sales under the MESCHAIN Brand

We strive to enhance brand value by manufacturing under the MESCHAIN brand and distributing through both physical and online marketplaces.

We operate across all marketplaces in Türkiye, including Trendyol and Hepsiburada, as well as on international platforms such as Amazon, eBay, and Etsy.

8.2. Warehouse Management Systems and Sales

Our objective is to establish ourselves as the largest supplier of non-stocked products by making our offerings available for purchase in both local and global marketplaces, through our own retail outlets and via dropshipping.

We intend to establish a warehouse system across four countries: Turkey, the United States, Saudi Arabia, and China. Our objective is to develop a rapid delivery network that facilitates swift shipping for sales on the Allmes.store platform, as well as for transactions on global marketplaces such as Amazon, eBay, and Etsy. Our ecosystem, grounded in production and supply, aspires to become a global supplier with a competitive structure. Our extensive supply network and sales potential will empower suppliers to select MESCHAIN as their partner for product sales.

8.3. Dropshipping and Supply Network

In the dropshipping model, sending the wrong product and shipments not created on behalf of the seller create the risk of store closure in marketplaces. Dropmes offers a definitive solution to these problems with invoicing on behalf of the seller, correct packaging and secure shipping processes.

01.

Supply Network

The products we manufacture or supply in China and Türkiye are stored in places close to the countries where there are marketplaces.

02.

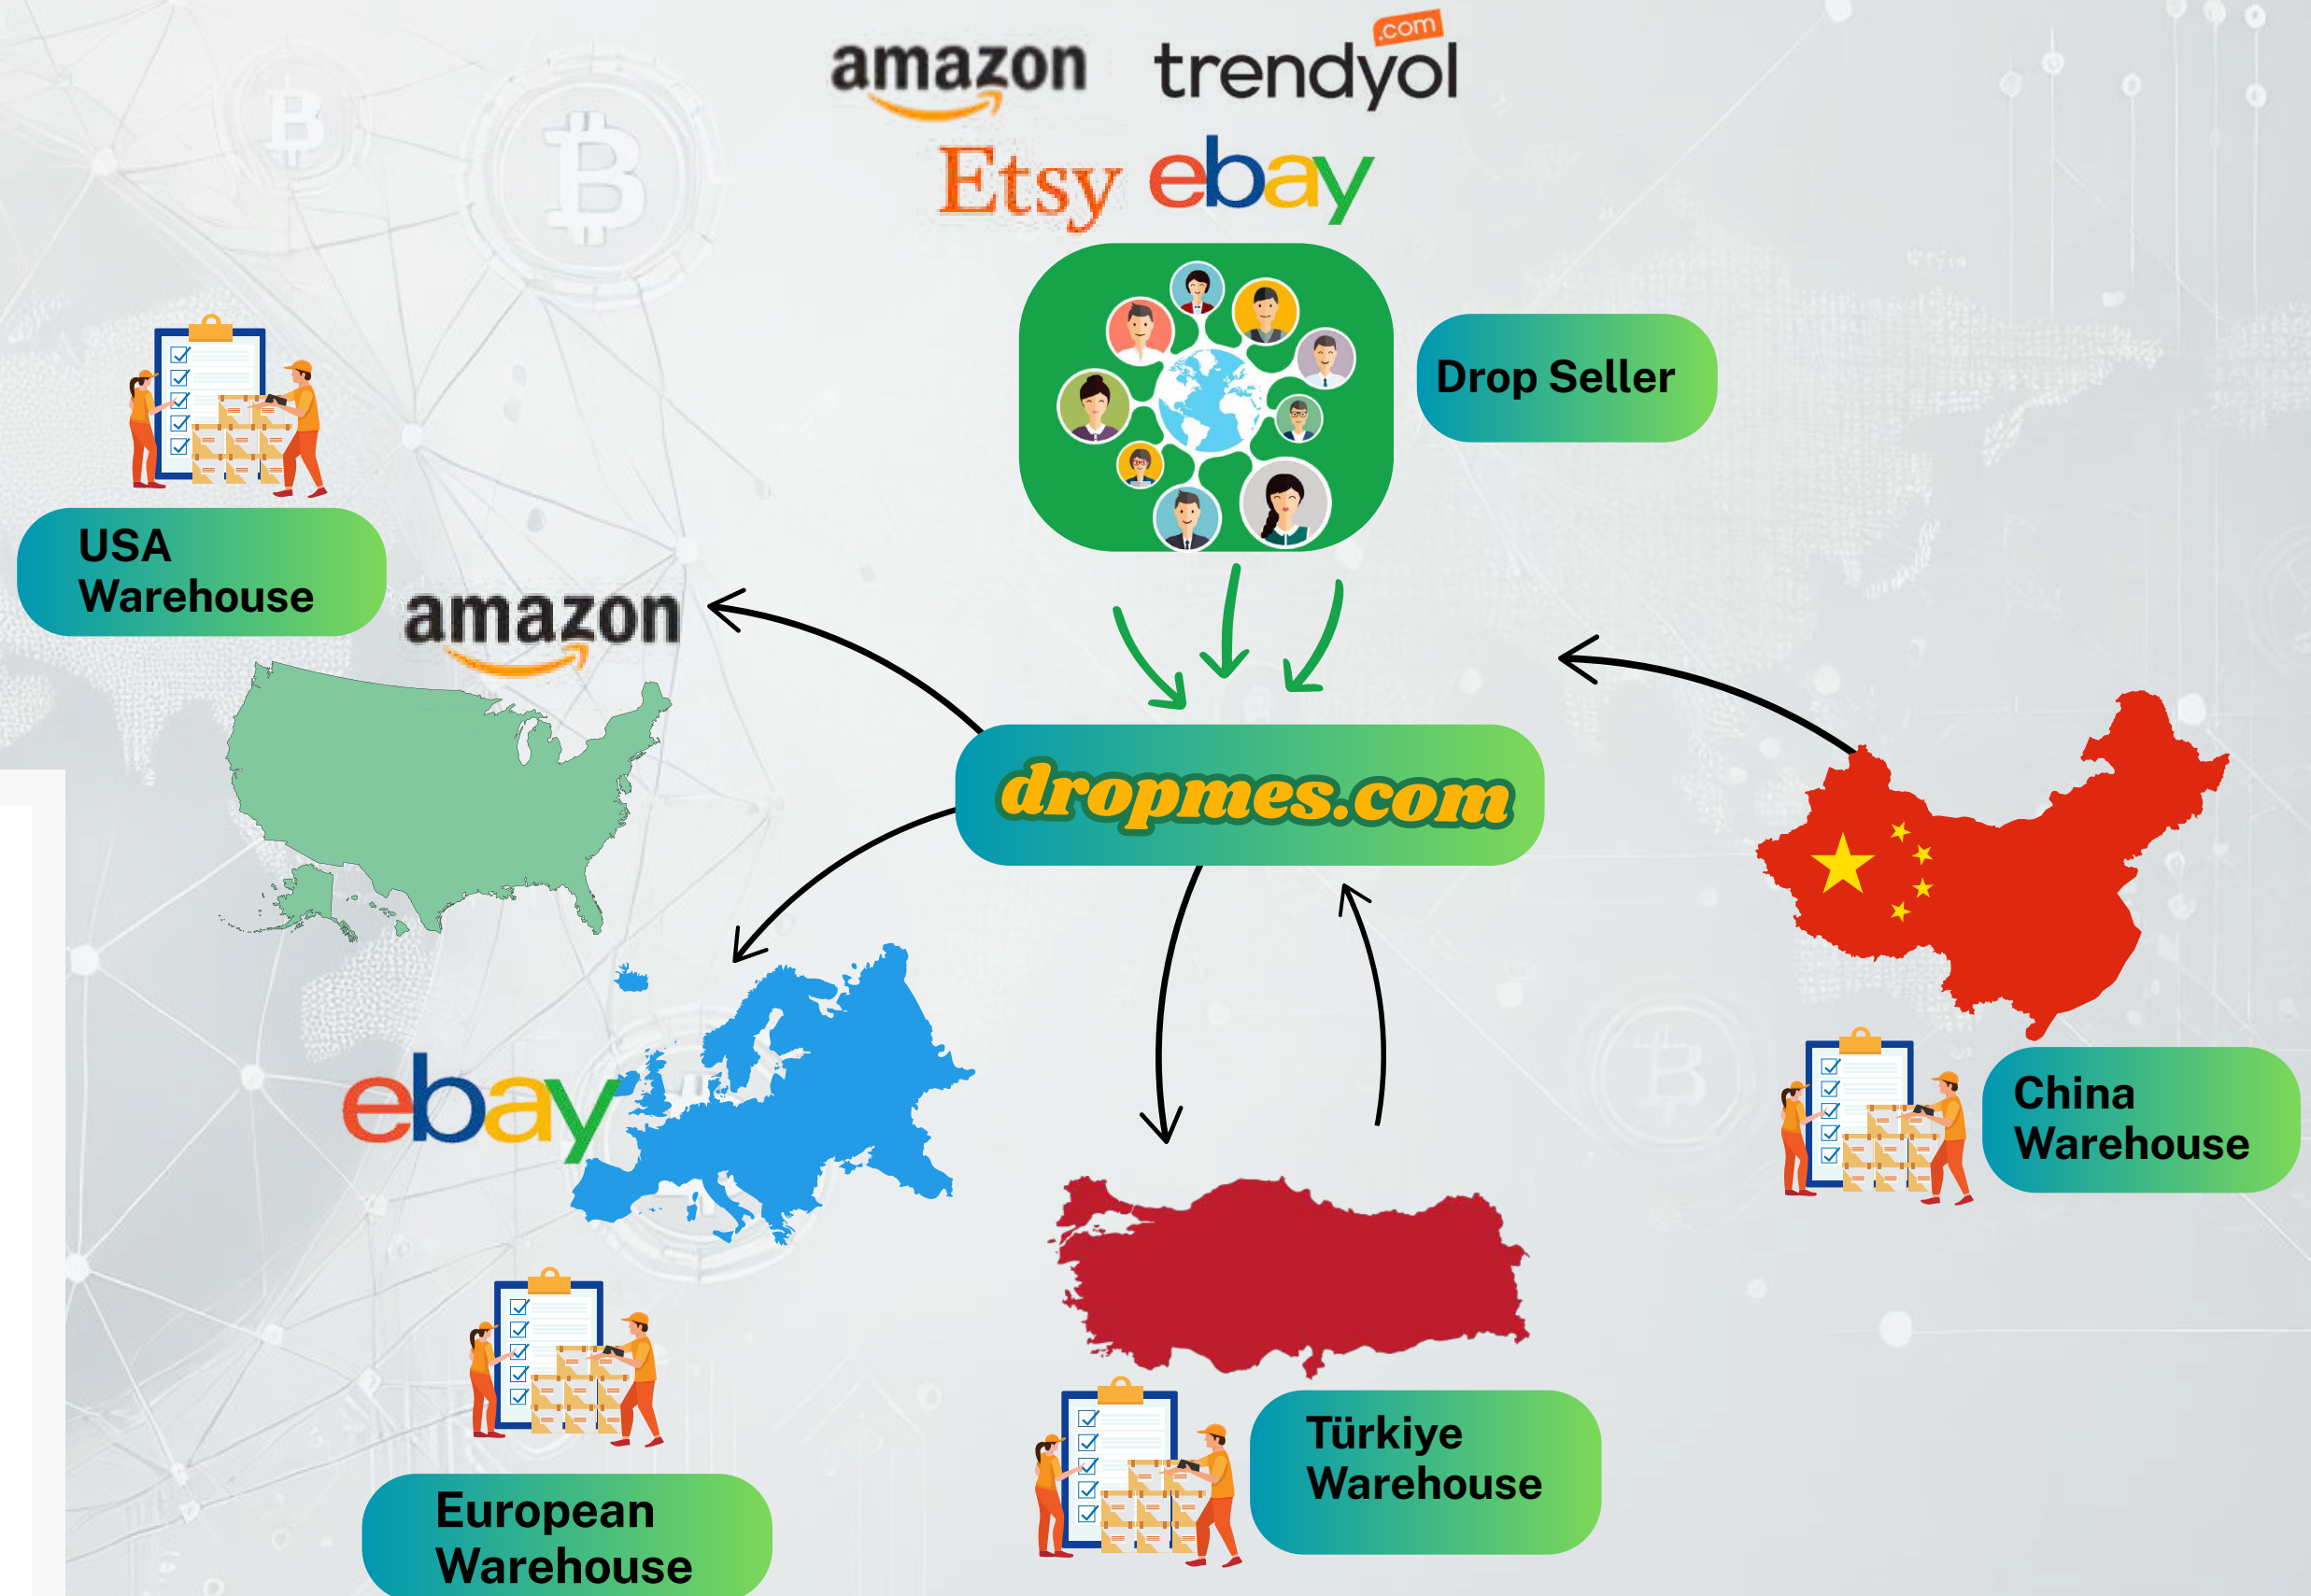

Warehouse System

Products are stored for fast delivery in countries where local and global marketplaces are concentrated.

03.

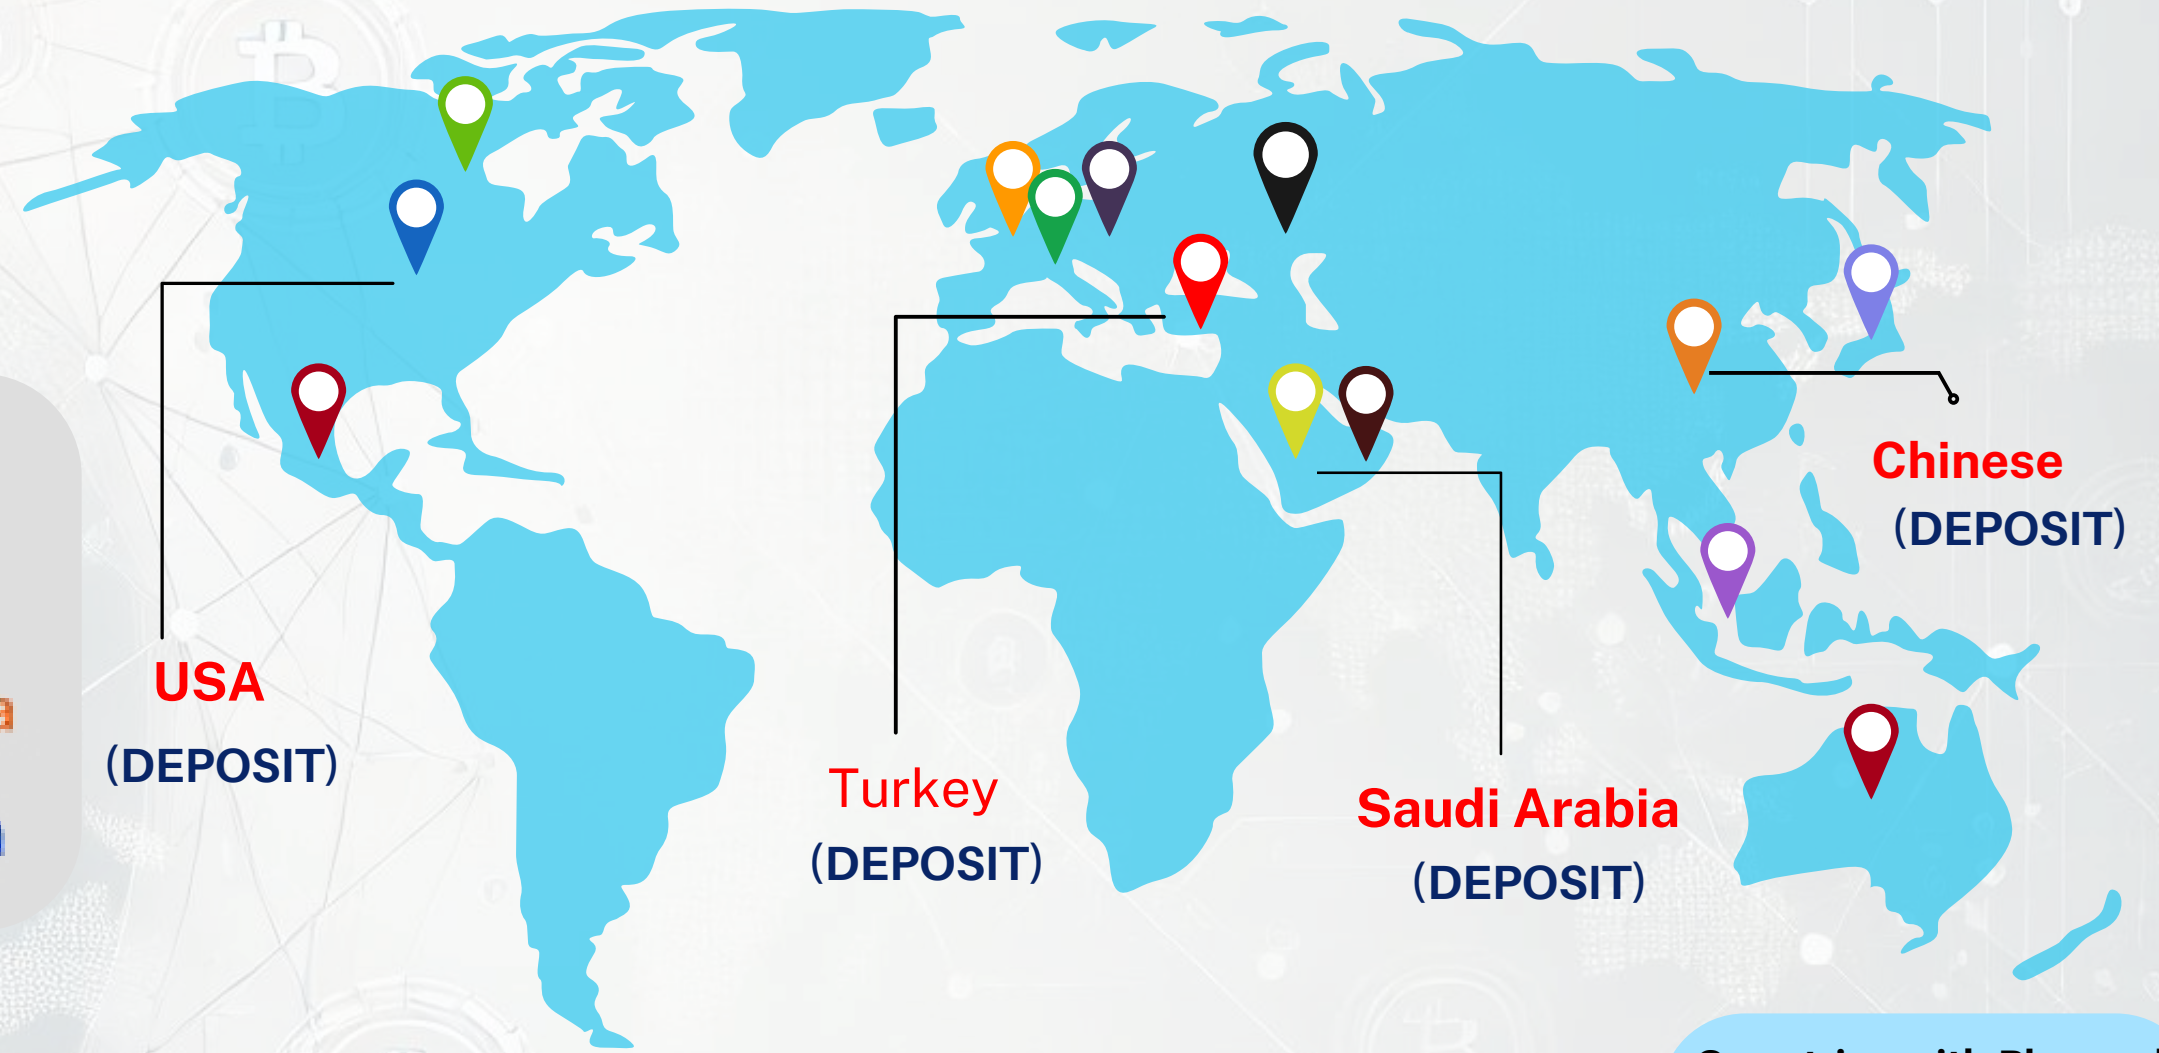

Order Submission

Sellers without stock create dropshipping orders for incoming orders. The product is shipped with the invoice created by the seller.

8.4. MesChain Retail and Supply Chain

We aspire to create the most extensive global supply and logistics network through MESCHAIN.

Marketplace	Türkiye	Germany	USA	Saudi Arabia	BAE	France	England	Australia	You possess	Mexican	Singapore	Russia
